60 MIN

PHYSICAL SCIENCES CONTROL TEST (blue)

JA, PE

TOTAL = 50

GRADE 10

Instructions

- The question paper consists of 4 questions.
- Answer all the questions.
- Answer section A on the answer sheet provided AND section B on folio sheets.
- A non-programmable calculator may be used.
- Number the answers correctly according to the numbering system.
- Round off to two (2) decimal places where necessary.
- A formula sheet has been provided on the back of the answer sheet.

SECTION A

- Answer on the answer sheet -

QUESTION 1: Multiple choice

Four possible options are provided as answers to the following questions. Each question has only 1 correct answer. Choose the correct answer and write the letter (A – D) next to the relevant question number (1.1 – 1.10) on the answer sheet.

1.1 L1	Which ONE of the following quantities is NOT a vector? A. Force B. Distance C. Velocity D. Acceleration
-----------	---

<p>1.2 L3</p>	<p>If an object moves 30 m to the right, then 20 m at a bearing of 30° and finally 25 m down, then the correct tail-to-head diagram for the entire motion of the object is...</p> <div style="display: flex; justify-content: space-around;"> <div data-bbox="276 178 876 483"> <p>A.</p> </div> <div data-bbox="876 178 1485 483"> <p>B.</p> </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 20px;"> <div data-bbox="276 483 876 808"> <p>C.</p> </div> <div data-bbox="876 483 1485 808"> <p>D.</p> </div> </div>
<p>1.3</p>	<p>A. B. C. D.</p>
<p>1.4</p>	<p>A. B. C. D.</p>
<p>1.5</p>	<p>A. B. C. D.</p>
<p>1.6</p>	<p>A. B. C. D.</p>

TOTAL SECTION A [12]

SECTION B

-Answer on folio paper-

QUESTION 2: JA to set 14 marks on *VECTORS* (2 MCs).

A fisherman wants to sail from the tip of the Cape of Good Hope to Cape Agulhas (the southern-most tip of Africa). On the day he sets sail, the ocean current is pushing the ship with a force of 350 N east whilst the wind is also pushing the boat with a force of 850 N east.

2.1	Define the term <i>vector</i> . L1	(1)
2.2	Calculate the resultant force exerted on the boat by the ocean current and the wind. Label the resultant force as F_{weather} . L2	(2)
2.3	In order to counter the effects of the ocean current and the wind, the fisherman sails due south. The motor of the boat produces a force of 3 500 N in magnitude.	
2.3.1	Sketch a vector diagram showing the force of the weather (F_{weather}), the force of the boat's motor (F_{motor}) and the resultant force acting on the boat ($F_{\text{resultant}}$). It is not necessary to draw your diagram to scale. L2	(3)
2.3.2	Determine the magnitude and bearing of $F_{\text{resultant}}$. L3	(3)
2.4	According to the fisherman's calculations the bearing of the boat needs to be 130° for him to reach Cape Agulhas. Based on your answer in question 2.3.2, what can the fisherman do to achieve this bearing? L4	(1)
		[10]

QUESTION 3: PE to set 26 marks on motion (3 MCs) - I suggest splitting into a question on ticker tape, a question with a graph and a question on equations of motion mixing definitions into all three.

3.1		(0)
3.2		(0)
3.3		(0)
3.4		(0)
3.5		(0)
3.6		(0)
3.7		(0)
3.8		(0)
		[20]

QUESTION 4: PE to set 10 marks on ENERGY (1 MC) - only simple kinetic energy and gravitational potential energy problems.

4.1		(0)
4.2		(0)
4.3		(0)
4.4		(0)
4.5		(0)
4.6		(0)
4.7		(0)
4.8		(0)
		[8]

TOTAL SECTION B [38]
